MailSite® Fusion LE 10

MailSite Fusion is a messaging server that delivers email, calendars and contacts to Microsoft Outlook, iPhone, iPad, BlackBerry, Android, Windows and Nokia smartphones

WHAT IS IT?

MailSite Fusion is a messaging and collaboration server that delivers email, calendars and contacts to Microsoft Outlook. MailSite Fusion also pushes email, calendars and contacts over-the-air to iPhone, iPad, BlackBerry, Android, Windows and Nokia smartphones. MailSite has been voted among the top 3 mail server products by readers of Windows IT Pro Magazine four times.

HOW IS IT DIFFERENT FROM EXCHANGE?

MailSite Fusion can scale to millions of subscribers on a fully active cluster of low cost servers. MailSite Fusion costs less than 50% of the price of Microsoft Exchange and MailSite Fusion can run on low cost hardware.

Users can access the same email, calendars and contacts from their desktop, a web browser or on the road from whichever smartphone they prefer.

WHAT'S NEW?

MailSite Fusion comes bundled with a new Sync Server that provides **full support for Microsoft Outlook 2013** for email, calendar and contacts. MailSite Sync Server allows you to sync multiple mobile devices with the same email account, allowing you to give all your sales team access to the sales inbox.

FEATURES

- Email, calendar and contact server that works great with Microsoft Outlook
- Shared calendar server that works with Microsoft Outlook, Google Calendar, Apple iCal and Mozilla Sunbird
- Customizable AJAX Web Client that works with Internet Explorer, Mozilla Firefox, Apple Safari, Google Chrome and Opera
- Extensive security including SSL/TLS, Authenticated SMTP, RBL & RDNS lookup, Directory Harvest Attack Protection (DHAP) and Compromised Account Detection
- Anti-spam protection including domain & IP reputation checking, Greylisting, white list and black list
- Anti-virus protection
- MIME-aware sieve filtering
