DATA SHEET

MailSite® 11 Anti-Spam

MailSite Anti-Spam is a layered spam protection solution that combines block lists, allow lists, greylisting and reputation lookups with Bayesian spam scoring to protect email users from spam and phishing messages

WHAT IS IT?

MailSite Anti-Spam is a layered spam protection solution. It combines block lists, allow lists, greylisting and online reputation lookups with a built-in spam scorer that includes Bayesian classification. Together they protect email users from spam and phishing messages.

HOW IS IT DIFFERENT FROM EXCHANGE ANTI-SPAM?

MailSite Anti-Spam is part of every MailSite 11 installation and needs no separate installation. You manage it in the same Console as the rest of the server. There is no separate administration interface.

HOW MUCH DOES IT COST?

MailSite Anti-Spam is an optional annual subscription, turned on by your license key. To get a price quote, please contact your MailSite sales representative.

HOW ARE UPDATES HANDLED?

The spam scorer's model, weights and word lists are installed with MailSite. Online reputation lookups ask public DNS lists about each message as it arrives, so a new spam source counts as soon as a list names it. Changes to weights, word lists or lists apply to the next message, with no restart.

WHAT'S NEW?

MailSite 11 replaces the old spam engine with its own spam scorer, which includes Bayesian classification. Each check adds to a message's score from 0 to 100: SPF, DKIM and DMARC failures, disposable sender domains, disguised links, spam keywords and listings in online reputation lists. Your Sieve filter rules then decide what happens to a message with a high score.

ENTERPRISE AND BUSINESS BENEFITS

- Reclaim lost time with layered spam protection
- Automatic, around-the-clock protection against spam and fraud
- Flexible Sieve rules cover your mail policy
- Deploy as a gateway or on the mail server
- Managed in the same Console as the server

SERVICE PROVIDER BENEFITS

- Remove spam administration overhead
- Automatic, around-the-clock protection against spam and fraud
- Protect many domains from one installation
- Available at server, domain or mailbox level
- Turned on by the license key, with nothing extra to install

DATA SHEET

MailSite® 11 Anti-Spam

FEATURE SUMMARY

- ☐ Layered, flexible anti-spam solution
- ☐ Bayesian spam scoring, built in
- ☐ Online reputation lookups
- ☐ Greylisting
- ☐ Weights and word lists you can tune
- ☐ Supports multiple virtual domains
- ☐ Greylisting shared by clustered servers

REQUIREMENTS

The spam scorer is built into MailSite 11.

Hardware

- ☐ 8 GB of RAM or more
- ☐ 1 GB of free disk space to install or upgrade

Software

- ☐ Windows Server 2012 R2 or later, or Windows 11
- ☐ NTFS file system
- ☐ MailSite SE, LE or SP 11

ADMINISTRATION

- ☐ Console desktop app
- ☐ Console in a web browser

LICENSING

MailSite Anti-Spam is an optional annual subscription. It is part of the MailSite installer and is turned on by the license key. You can enable it for all mail or only for the domains and mailboxes you choose.

For details on MailSite Anti-Spam licensing, please contact sales@mailsite.com.
